英検準1級 リスニング Part 2

模擬問題 5セット・全10問

各英文を音声で聞き、内容に関する2問の答えを1つ選んでください。英文スクリプトと正解は問題用紙に掲載していません。

第1セット

Q1. What has contributed to the increase in wildlife in cities?

(1) New laws requiring residents to keep wild animals.
(2) Green-space projects that unintentionally created habitats.
(3) A decline in the number of parks and rivers.
(4) Programs encouraging people to feed wild animals.

Q2. According to experts, what will help cities and wildlife coexist?

(1) Moving all wild animals to rural areas.
(2) Stopping all new park construction.
(3) Careful planning and cooperation with local communities.
(4) Allowing wildlife to enter residential homes.

第2セット

Q1. What is one benefit of repair cafés mentioned in the passage?

(1) They teach visitors how to manufacture new appliances.
(2) They help reduce waste while giving owners repair skills.
(3) They guarantee that every household product can be fixed.
(4) They provide replacement parts for all older devices.

Q2. Why do many repair cafés refuse to handle certain appliances?

(1) The owners usually do not want to learn about them.
(2) The devices are too new to be examined by volunteers.
(3) A repair could create risks such as electric shock or fire.
(4) Local governments have prohibited all electrical repairs.

第3セット

Q1. What did researchers discover about the timing of bird migration?

(1) All species now begin their journeys at the same time.
(2) Most birds wait until insects have disappeared.
(3) Temperature has no effect on when birds travel.
(4) Some species changed their timing, while others changed little.

Q2. Why might long-distance migrants respond less to conditions near their destination?

(1) They avoid traveling during the winter.
(2) They spend much of the winter somewhere else.
(3) They always arrive after nesting sites have closed.
(4) They cannot detect changes in day length anywhere.

第4セット

Q1. Why could local crop varieties be valuable in the future?

(1) They may have traits that help crops handle difficult conditions.
(2) They can grow without farmers or scientific support.
(3) They always produce more food than modern crops.
(4) They remove the need to store seeds in collections.

Q2. Why do many seed programs work directly with farming communities?

(1) To replace scientists with traditional farmers.
(2) To avoid testing seeds in actual fields.
(3) To prevent farmers from growing familiar crops.
(4) To preserve practical knowledge as well as seeds.

第5セット

Q1. Why do researchers ask residents about their experience of a space?

(1) To learn which trees grow fastest in the city.
(2) To determine whether businesses support weekend events.
(3) Because measured sound levels do not show how safe or comfortable a place feels.
(4) Because they plan to remove every source of city noise.

Q2. What is the main aim of creating quiet areas in cities?

(1) To make every public space completely silent.
(2) To give residents more choices about where to spend time.
(3) To prevent businesses from using nearby streets.
(4) To replace parks with sound barriers.
